Colleague Experience · Service Design · Product Strategy

Senior Product Designer with six years' experience delivering digital products, improving colleague experiences and simplifying complex operational workflows at British Airways.

I specialise in user research, service design and enterprise applications, including working within third-party platforms such as SAP and Unily. My work combines hands-on product design with strategic thinking, cross-functional collaboration and data-led decision-making to deliver measurable improvements in usability and operational efficiency.

Beyond product delivery, I have led initiatives in design strategy, design systems, governance and AI adoption, helping teams establish more consistent and scalable ways of working.

## Work Experience

### Senior Product Designer

British Airways · London, UK

Present - June 2024

Lead product design, research and strategy for colleague-facing applications, improving operational workflows while driving design governance and innovation.

- Enterprise workflows: Redesigned SAP-based material receipting, reducing task time by 55% and errors by 30%.
- Colleague experience: Improved Unily intranet information architecture, increasing task completion by 43%, reducing incomplete searches by 68% and time to first click by 40%.
- Internal applications: Helped transform Excel-based crew rostering into a React application, improving efficiency and accuracy.
- Design strategy: Established design metrics, governance and AI guardrails, and led the organisation-wide rollout of Figma Make.
- Developer experience: Led research and dashboard design for Helios, translating stakeholder needs into engineering reporting requirements and helping shape CodeScene features and adoption.

### Product Designer

Hangar 51 - IAGi · London, UK

January 2024 - June 2024

Led UX research and product design within IAG's Rapid Development team, collaborating with engineers and stakeholders to take ideas from early discovery through prototyping and delivery.

- Designed and prototyped digital products using Figma and SwiftUI, translating complex operational requirements into intuitive user experiences.
- Led interviews, usability testing, workshops and surveys to validate concepts and inform product decisions.
- Led design for Pack My Bag, a smart packing application with projected annual savings of $7.5 million in fuel costs and potential reductions of up to 27 million kg of $CO_2$.
- Supported product strategy and prioritisation, balancing user needs, technical feasibility and business opportunities.

### Senior UX Designer

IAG Transform · London, UK

August 2023 - January 2024

Led cross-functional service design initiatives to improve colleague experiences and operational efficiency at Heathrow Terminal 5.

- Used colleague research, service mapping and operational data to identify process inefficiencies, contributing to a reduction of approximately 505 IT tickets per month
- Delivered a data-led device refresh programme, generating £350,000 in annual engineering cost savings.
- Collaborated with engineering, architecture and operational stakeholders to improve internal services and prioritise improvements across digital and physical touchpoints.

## Work Experience (cont.)

### UX & Service Designer

IAG Transform · London, UK

January 2022 - August 2023

Designed and improved colleague-facing digital products and physical services, including internal applications, the employee portal and IT support experiences.

- Applied user research, journey mapping and service design to identify friction across colleague workflows and service touchpoints.
- Redesigned the Tech Bar walk-up experience, achieving 99% customer satisfaction.
- Developed a communication strategy that contributed to a 64% reduction in IT ticket complaints.
- Introduced research methods and Lean UX practices, facilitating workshops and supporting the adoption of user-centred design across teams.

### Tech Graduate

IAG Transform · London, UK

September 2020 - January 2022

During my time as a tech graduate I had the privilege to spend 3 to 6 months in different roles around the airline group. At Hangar51 I worked with the international aviation authority on UX/UI for digital ID's. For 3 months I was then exposed to enterprise architecture, contributing to the development of service design requests. For my last placement of 6 months I got hands on experience developing and designing a CRM portal for IAG Loyalty, using modern Javascript frameworks.

### Design Consultant

TietoEvry · Stockholm, Sweden

January 2020 - September 2020

This internship taught me how to work as a sole designer within a small innovation team, giving me the basis of my self starting journey. By the end we delivered and presented a student driven debit / loyalty card to a major Swedish bank.

## Education

### BEng Mechanical Engineering with Product Design

University of Glasgow / Glasgow School of Art · Glasgow, Scotland

2012 - 2016

My degree combined mechanical engineering at the University of Glasgow with design at the Glasgow School of Art, culminating in a final-year project redesigning a top-bar beehive to improve ergonomics and bee welfare.

I also co-founded the Glasgow School of Art Beekeeping Society, running workshops and maintaining shared hives.

### BMus Composition

Royal Conservatoire of Scotland · Glasgow, Scotland

2016 - 2020

Studied classical and electro-acoustic composition and had works performed by soloists and ensembles across Scotland. Wrote the music for a Fringe musical and played in the band.

Ran a music ensemble of fellow composers / players, where I also conducted.

## Skills, Tools & Accreditations

### Design & Strategy

Design Ops · Design and AI · Design Governance · Design Strategy · Design Systems · UX / UI Design · Figma & Sketch · Storybook · End-to-end Product Design · Responsive Design · Service Design & Blueprinting · Workshop Facilitation & Co-creation · Systems Design · Inclusive & Accessible Design · Adobe Suite

### Platform and technical

SAP · Unily · enterprise applications · design systems · AWS concepts · Javascript · React / Angular · SwiftUI · Git · Github · Github actions · Jira & Confluence

### Research

User Research & Usability Testing · Ethnographic Research · Journey & Service Mapping · Heuristic Evaluation · Qual & Quant Synthesis · AI research tools (we use Askable)

### AI

Figma & Figma Make · MCP · AI skills / guardrails · Agentic AI · LLM-assisted Design & Prototyping · Claude & Claude Code Connect · Lovable

### Accreditations

AWS Cloud Practitioner (2026)
UX Strategy (Fountain Institute)
SAFe 5 Program Consultant (SPC)
ICAgile certified professional
DevOps fundamentals
